RE:

Dear Dr.

SONOGRAPHY OF THE AORTA

Static images were obtained over the abdominal aorta in its proximal, mid and distal portions during real time sonography.

The aorta measures 2.4 cm. proximally by 1.8 cm. mid portion by 1.5 cm. in its distal portion. These are normal measurements without evidence of aneurysm or significant stenosis detected.

Flow velocities are also unremarkable measuring 0.45 m/sec proximally, 0.55 m/sec mid portion and 0.24 m/sec distally.

IMPRESSION: NO SIGNIFICANT AORTIC DISEASE DETECTED.

Sincerely,

Board Certified Radiologist

CB/dl
