RE:

Dear Dr.

THYROID SONOGRAPHY

Multiple static images were obtained during real time sonography of the thyroid.

History: Nodules.

The right lobe measures 3.8 cm. in greatest length by 1.1 cm. in AP and 1.7 cm. in transverse diameters.

The left lobe measures 3.8 cm. in greatest length by 1.5 cm. in AP and 2.0 cm. in transverse diameters.

The isthmus measures 0.7 cm.

Lobes are normal in size, heterogeneous in echo pattern and symmetrical in size.

Complex nodule affects the anterior margin of the left lobe measuring 0.7 cm. Complex nodule on the right measures 1.0 cm.

Follow up to include nuclear thyroid scanning therefore recommended.

IMPRESSION: BILATERAL COMPLEX NODULES REQUIRE FOLLOW UP AS NOTED ABOVE.

Sincerely,

Board Certified Radiologist

CB/dl
